### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: prior art of record does not describe or suggest applicants' invention set forth in claims 1-22, a method for operating on a workpiece with a top surface, a conductive layer and a bevel edge wherein the workpiece is processed with the workpiece disposed in a lower chamber of a vertical chamber assembly and is moved up to an upper chamber, the upper chamber is sealed and the bevel edge of the workpiece is removed, in the context of the recited process. Similarly, prior art of record does not describe or suggest the invention of claims 23-31, an apparatus with a vertical chamber assembly including an upper chamber and a lower chamber (the upper chamber being separable from the lower by a movable guard to provide a sealed upper chamber), a moveable rotatable workpiece holder adapted to move between the upper and lower chamber, a workpiece processing system, and an edge bevel removal system in the upper chamber, in the context of the recited apparatus.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Cited Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nayak et al. (U.S. Patent No. 6,494,219) teaches an apparatus with an etchant control system for removing plating contaminants (abstract). The

Art Unit: 2813

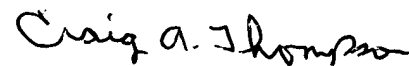

apparatus includes edge bevel removal (column 2, line 64 – column 3, line 35). Moinpour et al. (U.S. Patent Pub. No. US2001/0052159) teaches a belt wafer edge cleaning apparatus (abstract and title).
